PROFESSIONAL SUMMARY

BCA (Data Science/AI-ML track) student with applied experience across the analytics pipeline — data collection, cleaning, validation, and reporting for a live production system serving 100+ field agents. Google Cloud Diamond League certified (14,539 pts) in Gemini API, Vertex AI, and multimodal RAG; Kaggle-certified in Python. Skilled at turning messy, real-world field data (financial inclusion/banking operations) into structured, validated datasets and automated reporting. Seeking a Data Science/Analytics internship.

TECHNICAL SKILLS

Data Science & ML: Python (pandas, NumPy), Prompt Engineering, LLM Agents, Gemini API, Vertex AI, Multimodal RAG, Data Preprocessing & Validation, Exploratory Data Analysis

Languages: Python, SQL (PL/pgSQL), TypeScript, JavaScript, Dart, C

Data & Backend: PostgreSQL, Supabase (Auth, RLS, Triggers, RPCs), Firebase, Firestore, REST APIs

Cloud & Tools: Google Cloud (Compute Engine, Cloud Run, Cloud Storage, Pub/Sub, Terraform), Git, GitHub, Docker, Vercel, Render, PapaParse (CSV pipelines)

Visualization / Reporting: Streamlit, Next.js dashboards, Excel/MS Office reporting

DATA / ANALYTICS-RELEVANT PROJECTS

BC Performance System — Field Data Pipeline & Commission Analytics

2025 – Present

TypeScript · Next.js 15 · PostgreSQL · Supabase · CSV/ETL

- Designed and built a CSV-based ETL pipeline for a live enterprise system used by 100+ BC (Business Correspondent) field agents, with drag-and-drop ingestion, custom column mapping, and automated data-type validation.
- Engineered a commission analytics engine applying automated 2% TDS calculation and financial validation checksums to catch data-entry errors before they reached reporting.
- Implemented a multi-stage data-approval workflow and a system Health Console for real-time data-integrity diagnostics across the pipeline.
- Enforced row-level data governance with PostgreSQL Row Level Security (RLS) policies and Supabase Auth, ensuring agent-level data access controls.

NASSCOM AI Vibe Coding Workshop — Applied LLM Data Applications

2025

Python · LLM Agents · Civic Tech

- Built four Python LLM-based data applications: a complaint classifier, a document summarizer, a budget data analyzer, and a policy-document QA agent.
- Applied the CRAFT loop (Commit, Refine, Audit, Fix, Test) methodology to iteratively validate model outputs against structured test cases.

MeraMat — Gemini-Powered Civic Data Tool

2026

Gemini API · Cloud Translation · Maps Embed API

- Built a personalized voter action-plan generator for the PromptWars Virtual Challenge 2 hackathon, scoring 88.93%.
- Integrated Cloud Translation and Maps Embed APIs and expanded automated test coverage to validate generated outputs.

WORK EXPERIENCE

Field Operations & Software Development

2023 – Present

Sanjivani Vikas Foundation, Bihar — UCO Bank Business Correspondent / Financial Inclusion Program

- Collected and cleaned field data from a network of BC agents across rural Bihar (account openings, transactions, onboarding), directly informing the data models used in the performance-analytics system.
- Digitized and validated compliance documentation and NPA loan-recovery records for 100+ customer accounts, improving reporting accuracy.
- Analyzed inactive/surrendered BC point data to identify field-performance patterns, later automated into a commission engine and telemetry dashboard.

CERTIFICATIONS

- Google Cloud Skills Boost — Diamond League, 14,539 points (View Full Profile)
- Gemini Multimodality & Multimodal RAG · Gemini API in Vertex AI · Prompt Design in Vertex AI — Google Cloud, Jun 2025
- Cloud Infrastructure & Data Foundation (L1) · Terraform Essentials (L3) — Google Cloud, 2025
- Python (Data Analysis) — Kaggle · BSDM KYP — Bihar Skill Development Mission, 2023

EDUCATION

Bachelor of Computer Applications (BCA) — Data Science/AI-ML track

Expected 2028

Manipal University Jaipur (MUJ Online), Batch 10 — Coursework: Data Structures, Programming (C/Python), Database Management

Intermediate (Class XII), BSEB Patna

2023 · 1st Division
